

CprE 491 Weekly Report | DEC15-08 | Report #6 (3/2/2015)

Advisor: Hung Nguyen

Project Name: Manufacturing Software Support Reprogram

Client: VanGorp Corporation (Evan Zepp)

Members and roles in group:

Austin Benson – Team Leader

Nick Cervantes – Team Communication Leaders

Sean Finn – Key concept Holder

Evan Kroeger – Team Webmaster

Matt Petron – Key concept Holder

Weekly Summary

The goal of this week was to receive the codebase from VanGorp, and begin to read through the source, as well as begin to determine what parts are no longer needed.

Meeting Notes

No meeting this week

Our group did not meet this week. We received the codebase later than expected, due to Iowa State stripping the file out of the email we originally received. When we did finally receive it, it was past our normal available time to meet as a group. Therefore, we continued to prep individually.

Pending Issues

We received our materials from VanGorp later than intended, so our initial timeline is pushed back by a few days.

Plans For Next Week

Our plans for this week are very similar to last week, due to the slight delay we experienced. We will meet to discuss the codebase received from VanGorp. Afterwards, we will read through the source and begin to determine what code is no longer in use. We may also start on screen mockups.

Individual Contributions (This Week)

Austin Benson – Contacted Evan Zepp and Rod Blunck to receive codebase and worked with them to successfully receive it. Took an initial look through the code received.

Nick Cervantes – Started learning C#. Took an initial look through the code received from VanGorp. Compiled Weekly Report.

Sean Finn – Took an initial look through the code received from VanGorp. Continued research on integration with MancolaEX system.

Evan Kroeger – Finished the report section of the website, and continued other development. Took an initial look through the code received from VanGorp.

Matt Petron – Brushed up on C#. Tried execution of the received code in virtual DOS prompt.
